SUMMARY

Artificial Intelligence & Data Science graduate with hands-on experience in computer vision, edge AI, SaaS development, and real-time ML deployment. Experienced in developing real-world AI + IoT solutions, edge-device inference pipelines, and production-ready applications in startup environment.

EDUCATION

B.Tech., Artificial Intelligence & Data Science **2022-2026**
Dhanalakshmi Srinivasan Engineering College, Perambalur
CGPA: 8

SKILLS

Programming: Python, SQL
Machine Learning & AI: Scikit-learn, NumPy, TensorFlow, PyTorch, Keras, CNN, RNN, Transformers, OpenCV, YOLOv8
Backend & Deployment: FastAPI, Git, REST APIs, Uvicorn
Edge AI & IOT: Raspberry Pi, NVIDIA Jetson Orin Nano, Edge AI Deployment, Computer Vision, Image Classification
Core Fundamentals: Data structures and Algorithms, Sequence modeling, System Design

INTERNSHIP

AI Engineer Intern | SortyX Ventures Private Limited, Chennai **Mar – May 2026**
• Built and deployed AI-driven SaaS and smart waste management solutions using computer vision and IoT workflows. (On-site)
• Trained and fine-tuned YOLOv8n and MobileNetV2 models for edge deployment on NVIDIA Jetson Orin Nano.
• Represented the company in government startup and innovation events showcasing AI + IoT solutions.

Machine Learning Intern | TechPower Solutions, Chennai **Jun 2025**
• Developed a Random Forest model for player injury prediction using historical datasets and preprocessing pipelines with Pandas. (On-site)
• Evaluated model performance metrics and deployed a real-time Flask-based prediction interface.

PROJECTS

AI-Powered Automated Waste Segregation Bin
Tech Stack: Python, TensorFlow, MobileNetV2, OpenCV, Raspberry Pi
• Developed an AI-powered smart bin system capable of automatically classifying and segregating waste materials using computer vision.
• Fine-tuned deep learning models for real-time edge-device inference and integrated sensor-based automation workflows.

XAM.AI – AI Powered Study Buddy | [Link](#)
Tech Stack: Python, FastAPI, React.js, AI APIs
• Developed an Explainable AI Learning Assistant with personalized recommendations, progress tracking, interactive learning support, and explainable AI features to enhance transparency and learner trust.

Decision-Driven Customer Retention System | [Link](#)
Tech Stack: Python, FastAPI, Scikit-Learn, Pandas, Seaborn, REST APIs, Uvicorn
• Built an end-to-end ML microservice for customer churn prediction and financial retention analysis using FastAPI and Scikit-learn.
• Developed business utility evaluation logic and analytics dashboards to visualize customer risk and business impact.

CERTIFICATIONS

Introduction to Machine Learning – NPTEL (IIT) **Nov 2024**
Neural Networks and Deep Learning – DeepLearning.AI, Coursera **Apr 2025**
Convolutional Neural Networks – DeepLearning.AI, Coursera **Aug 2025**
